# OPEN SOURCE OPEN COMMUNITY
The Technical Club Of NITT

GREETINGS FROM OSOC

Dear (recipient name),

With immense pleasure we announce that OSOC is back and this time with much more exciting events and competition. Since its establishment OSOC has been successfully conducting events and we have provided many workshops over the years. Over the past years we worked hard to expand our domain and with great pleasure we are informing you that OSOC is now one of the most successful clubs of MCA in NITT.

Last year OSOC conducted its annual event TECHNOFANIA , an interdepartmental event in which we witnessed large number of participants in our events. We conduct many events in our annual meet like AAGAMYA, Web Kirti, HIQS and many more.

AGAMYA - "AGAMYA", it is the flagship event of TECHNOFANIA. It is a hackathon event in which Students from MCA and different department participate. Kartik Gupta , Ravina verma and Shivam Tiwari from 2021 Batch were judges for the first rounds.

WEB KIRTI - An exciting and wonderful chance for participants to show their skills and creativity in web development.

HIQS - A non-technical event in which participants get a chance to showcase their talent in poetry , story writing Painting and debate.

OSOC has been active in conducting various workshops for students on open source software like git , github , linux and helped in creating awareness and benefits of open source.

All these would not have been possible without the support and contribution from you all. We would like to invite you be a part of open source and help us. We couldn't have achieved our goals and this year again we are counting on you for your support and funds. While we are actively trying to strengthen our community and expand our club even further , your support is crucial for us to make our efforts go even further.

You can help us by providing fund on the link given below. We hope that we can count on you for your support to make this year's event one of our best one yet!

We would like to thank you in advance for believing in us and helping us.
